

2 new ET Extension Probes for ENAR and SCENAR

These two extension electrodes are very well designed and built to both last, and to perform, consistently well. They both have a two-year replacement warranty and both of these hi-spec probes have been manufactured by Enlightened Therapies, **for the discerning therapist.**

ET Remote Probe

The ET Remote Probe is an extension electrode for wherever you need remote access so you can take IR's - or - treat areas that may be more difficult to access - or - have the patient deliver treatment to areas that may require privacy.

ET Acu-Point Probe

The ET Acu-Point Probe is an extension electrode for treating key-points and / or difficult access areas. Fully functional for IR and Dosing, yet very focused, so Acupuncturists can use ENAR or SCENAR with this probe to precisely treat meridians.

Also Introducing the **new Fine Line Beauty Wand** (exclusively for self-treatment). This very fine point electrode is perfect for getting into those 'smile lines', spots, wrinkles and other tight areas. However, the wand's design means ***only for treating your self.***
